Enterprise AirPrint

Presto is a robust solution for enterprise mobile printing. Presto integrates with a corporate network's DNS servers leveraging one-of-a-kind cross platform technology for client devices and print hardware manufacturers. Presto leverages the same technology across iOS, OS X, Android, and Chrome OS. Presto is the premier solution for mobile print with Magic Queue (pull printing), QR Code Scan release, Printer Geolocation, Print Management Integration and more. Supported Client Operating Systems: iOS 10.7+, Android 5.0+, Chrome 44+

Enterprise AirPlay

With Presto, AirPlay is enterprise ready. You've always wanted to use AirPlay in your corporate or campus network, but the enterprise administration and management tools weren't there to support it. With Presto, you can use the same tools for managing Apple TV's as printers on your network.

Enterprise Web Services

Administrators can locate web services in the physical environment and make services specific to on enterprise networks and allow administrators to manage their visibility. Make specific files and websites visible via geolocation.

Rules Engine

The Presto rules engine provides unprecedented capability for managing client devices and network services. If
